EDUCATION

Sant Longowal Institute of Engineering and Technology   Sangrur, Punjab
Bachelor of Engineering in Electronics and Communications - CGPA : 8.63/10   *Aug. 2020– Present*

EXPERIENCE

MERN Stack Development Intern   Nov. 2022 – Feb. 2023
Xciteducation Worldwide   *SLIET, Punjab*
- Worked on component interaction and Routing. Integration of API with Backend. Worked closely with UI and the Backend team.
- I have learned many things from this internship. Mainly I worked on MongoDB, React Js, Express Js, Node Js, Material UI, Responsiveness.
- This remote internship has made me a more patient person and improved my ability to work in a team. I have learned numerous things from this entire experience that I wouldn't have if life had carried on as normal.

PROJECTS

Room Booking Website /*Live Site* / *Node.js, React.js, Express.js, CSS, MongoDB*   Aug 2023 – Aug 2023
- Spearheaded the design and development of a robust MERN stack room booking platform, by executing essential features such as advance user authentication, admin section, room history section, owner section and booking functionality.
- Room image uploader section, date range filter, room's image uploaded on cloud.
- Utilized MongoDB for seamless data storage, implemented Express for efficient server-side routing via APIs, harnessed React for an intuitive front-end user interface, and leveraged Node.js for the back-end server.

Pizza Ordering Website /*Live Site* / *Node.js, React.js, Express.js, CSS, MongoDB*   Jun 2023 – July 2023
- Spearheaded the design and development of a robust MERN stack pizza platform, by executing essential features such as user authentication, shopping cart, and ordering functionality.
- Utilized MongoDB for seamless data storage, implemented Express for efficient server-side routing via APIs, harnessed React for an intuitive front-end user interface, and leveraged Node.js for the back-end server.

Blog Website /*Live Site*/ *Bootstrap, React Js, Node.js, Express.js, MongoDB, CSS*   Apr, 2023 – Apr, 2023
- Conceptualized, designed and developed a MERN stack website to enable users to post their blog with image, title and description.
- Utilized MongoDB to efficiently store data, implemented Express for streamlined server-side routing, harnessed React for a user-friendly front-end UI, and leveraged Node.js to ensure a smooth back-end server operation.

CRUD Application /*Live Site*/ *Node.js, React.js, Express.js, CSS, MongoDB*   Mar 2023 – Mar 2023
- Developed a full-stack web application using REST API with React as a frontend. In this application crud operation is performed with the help of MERN and users can also download their information in pdf format.
- Utilized MongoDB to efficiently store data, implemented Express for streamlined server-side routing, harnessed React for a user-friendly front-end UI, and leveraged Node.js to ensure a smooth back-end server operation.

Portfolio Website /*Live Site*/ *React.js, CSS*   Apr 2023 – Apr 2023
- Developed web application using React as a frontend. In this application I have designed skill section with beautiful animation and someone can message me filling their query and submit. I will receive their message on email.

ACHIEVEMENTS

- **LeetCode** handle: Anujkumar6563 Solved 280+ DSA Problems
- **GeeksforGeeks** handle: anujkumar666768 Solved 100+ DSA Problems
- **Training** : Web Development by RAD TechPro Services Pvt Ltd, Doordarshan.

TECHNICAL SKILLS

Programming Languages: C++, MySQL
Web Development (Full-Stack): HTML5, CSS, Bootstrap, React.js, Javascript, Node.js, Express.js, MongoDB
Developer Tools: Git, VS Code, Netlify, GitHub
Others: Data structures and algorithms, OOPs, Operating system, DBMS
